Is Woodworking4Home Worth The Money and Is It Really The Product For Me?

What will you get from Woodworking 4 home? To answer this question lets take a look at the advantages of [WoodWorking4Home](#).

Saves Money and Time:

I know you may be here looking for free woodworking plans. There are a lot of "free-plan" websites out there, but I must admit: "you get what you pay for!" None of these free plans were really good. The ones I did download turned out to be just cheap copies that were difficult to read. I know for a fact that you are looking for the best and most detailed guide to start your woodworking projects.

With WoodWorking4Home designs and plans, you do not need to get exhausted from trying to measure every possible detail, no need to mess with confusing and vague plans making it harder than necessary, and ultimately not have to spend your wealth in the DIY shops.

Biggest Project Database Online:

Woodworking4Home is a huge gallery of 14,000+ woodworking plans. This gallery is a clear, detailed, and step-by-step guide on how you can make your own wooden products.

There are many different designs that would suit many people with different needs. For example, they have designs for a wooden playhouse, a back deck, dog houses, book cases and many other home items made out of wood. Of course, those who are creative and want to come up with their own designs may want to rely on themselves, but this package certainly gives a lot more great designs for both the creative and both non-creative people.

Having seen all the designs and blueprints inside this package, I must say that I am truly impressed with what I have found inside. When you take some time to explore this huge database, you will definitely find the kind of plan that will best suit your taste. Yes, it can take some time, the database is huge!

Great Customer Support:

For a limited time, John is giving \$50 off the normal retail price of \$98. You can get [instant access to the 14,000 plans for only \\$49](#). I don't know how long John is going to keep giving this discount, but it wont be for long.

You don't just get a bunch of .pdf plans in a folder. What you get is streaming video tutorials, resources, ebooks and additional bonuses. Been able to watch an expert walk you step by step through a project is far easier than trying to work out what to do with a piece of paper a pencil and a load of incorrectly cut wood.

After sales customer support is very good. Support tickets are responded to with in 6 hours unlike other sites, you get unlimited support for the package. If you have questions about any project or design plan. John Metz himself is only an email away.

WoodWorking4Home Is For Everyone:

One of the biggest advantages is that your knowledge in woodworking will not matter. Plans included in the Gallery are designed to get tasks done quickly, cheaply and with professional results.

The step by step plans included make it easy for you to get on with your project even if it's your first time.

It does not matter if you are a hobbyist or a professional woodworker anyone can benefit from the woodworking plans included.

The Bottom Line - Woodworking 4 Home

In my opinion [Woodworking4Home](#) is honestly the most specialized and detailed Woodworking plans and designs ever written.

The system is the **only one** on the market that helps DIY fanatics to get the job done cheaply, quickly and without any mess or fuss.
